25X1

1. India has established the "Tata Institute for Nuclear Research" at Bombay.
2. Confidential proposals are now being made from the Soviet side for a future cooperation with the Indian scientists. The leader in the negotiations is Prof. G. F. Alexandrov, who is visiting India as head of a Soviet delegation to the 41st meeting of the Indian Science Congress. [Ed. Note: Indian Science Congress was held in Hyderabad, 2-7 Jan 54.]
3. The Soviet proposals point to the assimilation of Indian atom research by Soviet research and the acquisition of cyclotron data from the Soviet Union.
4. An important member of Professor Alexandrov's scientific staff is Dr. Natarov, who asserted on first establishment of contact with the Indian specialists that the Soviet Union had been making use of atomic energy for peaceful purposes since the autumn of 1947. He alluded in this connection to great explosions in northern Siberia.
